5. Proceedings Errata

As there is an error on page 79 in the 2002 Proceedings you will find a copy of the correct page included with this Newsletter. The two graphs on the page were switched. Also, the correct page will be printed in the 2003 Proceedings as Appendix C.

4. Call For Papers

You will note that we have included a “Call for Papers” with this Newsletter. We have tried this in previous years with minimal success but felt that we should try again and hopefully receive some abstracts at the conference or shortly thereafter. The submission of abstracts seems to be coming in later each year making it difficult to both assemble a suitable program and allow sufficient time for authors to prepare and submit their papers to the Editor by the required date. Your cooperation is certainly appreciated by the Board, the Technical Program Committee and the Editor.
