

# Jen Penner

## ***Education:***

2017-present M.Sc. Civil Engineering-Candidate, University of Saskatchewan  
2014 B.Eng. Chemical Engineering, University of Saskatchewan  
2014 B.Sc. Biology, University of Saskatchewan

## ***Work Experience:***

2013-present- Integrity Engineer, Pounder Emulsions/Husky Energy, SK  
Technical Services Engineer, Pounder Emulsions/Husky Energy, SK  
Operations Engineering Intern, Pounder Emulsions/Husky Energy, SK  
Lab Technician, Pounder Emulsions/Husky Energy, SK

## ***Memberships and Related Activities:***

Member, Association of Professional Engineers, Saskatchewan  
Member, of CTAA since 2015  
Member, ASTM  
Member of LAC in 2018 Regina CTAA conference

## ***Reasons I want to be a Director:***

Over the past years asphalt has “stuck” with me and become my career and my passion. I entered the asphalt industry working for Husky Oil six years ago. In those six years I was exposed to a variety of roles in operations, quality control, technical research, engineering, and projects. This exposure has given me the opportunity to meet and develop relationships within our local asphalt industry. I think that these relationships are imperative for success in the director role. I am committed to advancing the industry, specifically improving asphalt binder quality and specifications, and have strong desires to be involved in collaborative research that will result in better performing longer lasting roads.

In 2017, I was awarded the graduate scholarship from CTAA to pursue research at the University of Saskatchewan working towards my M.Sc. in Civil Engineering. I am grateful for the support of CTAA and serving as a director for the Prairies would let me reinvest with the organization and community. If elected I will work diligently to progress learning, sharing, and growth in the industry.
