- ASTTBC (Applied Science Technologist & Technicians of British Columbia)
 - Certified Technician “CTech”
 - Registered Technology Manager “RTMgr (P)”
- Member of BC Road Builders since 2015

REASONS I WANT TO BE A DIRECTOR:

I am thrilled to be a candidate for CTAA Director in the British Columbia region. I was a member of the LAC the first year I joined and have been an avid CTAA promoter ever since. I have been to every conference since 2012 and plan to continue the trend. The technical papers, networking, and CTAA events are a valuable experience for me each year.

I've had many technical asphalt positions leading me to where I am now, and feel the experience and knowledge gained could be an asset to the Association. Currently I am the Assistant Manager and a Project Manager for a Materials Testing and Quality Management division. I have nearly 13 years of experience testing asphalt in both the field and laboratory, creating asphalt mix designs, performing asphalt pavement condition assessments, and providing clients with consultation. I have large scale project delivery experience including major airport, port, roadway, highway, and bridge projects involving multi-disciplinary teams, and various stakeholders. I'm an organized, efficient, and highly motivated individual that enjoys offering my technical services and consultation to others.

Since my LAC experience in Vancouver 2012, I have aspired to contribute more to the Association. If elected BC Director, I would be given an opportunity to contribute my time and effort to the CTAA.
