

(The Pre-Conference Workshop will be presented on its own day)

Part I

Regional Director's Reports – “Local Case Studies on Green Technology/Concepts”

John Laxdal – British Columbia Director

Richard Hart – Alberta Director

TBD – Prairies & Territories

Selena Lavorato – Ontario Director

Veronique Szabo – Quebec Director

Brandon MacDonald – Atlantic Director

Part II

“IMPLEMENTATION OF PERFORMANCE TESTING”

1. 2019 Contractor's Workshop Poll Questions (Selena Lavorato, Coco Paving)

Questions designed for the 2019 Contractor's Workshop panelists will be shared with attendees. The questions were designed to lead the discussion into the details of performance testing. These questions will serve as a starting point for the session and help get everyone thinking.

2. Implementation of Performance Testing (Mike Anderson, Asphalt Institute)

This presentation will look at the current implementation of performance testing in specifications across the United States. We will have an overview of the different styles of implementation and the impact it has had on pavement quality.

3. Performance Testing Case Study (Randy West, NCAT)

By looking at case studies, we can understand how the results of performance testing can be interpreted, how it influences the mix design and ultimately the effect on performance. There are plenty of interesting projects to look at which will improve the understanding of how performance testing goes from laboratory design to the field.
