WHY I AM RUNNING FOR 2ND VICE PRESIDENT

The CTAA is a tremendously professional organization that is served by highly skilled people and world-class contributors. It has been an honour to be associated with the CTAA and to have contributed to its organizational effectiveness over the years. This is a path that I would love to continue as a member of the executive team. My commitment is to bring the same level of care and devotion to the board that I have always brought and to do it alongside the already great team that is stewarding the CTAA in order to build on the technical body of knowledge and continue to provide a forum that enhances collaboration and networking.
