- CUPGA (Canadian User Producer Group for Asphalt) Exec Committee Member 2021 to current
 - CUPGA 2020 Contractor's Workshop Panel Member for Warm-Mix Asphalt
- ASTTBC (Applied Science Technologist & Technicians of British Columbia)
 - Certified Technician "CTech"
 - Registered Technology Manager "RTMgr (P)"

WHY I AM RUNNING FOR BRITISH COLUMBIA DIRECTOR

I am honoured to be a candidate for the CTAA Director position in the British Columbia region. I was a member of the LAC the first year I joined CTAA in 2012 and have been an avid promoter ever since. I have been to every conference since 2012 (including cyberspace) and plan to continue the trend. The technical papers, networking, and CTAA events are a valuable experience for me each year.

I've had many technical asphalt positions and feel the experience and knowledge gained will be an asset to the Association. My experience in the materials testing, inspection, and quality management division with my previous employer gave me a solid knowledge base. My current employer has allowed me to learn the technical and operational side of the paving industry. This added layer of plant production and field construction background has been invaluable. I have 17 years of experience testing asphalt in both the field and laboratory, creating asphalt mix designs, performing asphalt pavement condition assessments, providing clients with technical solutions, creating paving best practices, training construction staff, conducting research and trials, and presenting new technologies to stakeholders. I have large-scale project delivery experience including major airport, port, roadway, highway, and bridge projects involving multi-disciplinary teams, and various stakeholders. I'm organized, efficient, and a highly motivated individual that enjoys offering my technical insight and consultation to others.

Since my LAC and CTAA experience at the Vancouver 2012 conference, I have aspired to contribute further to the Association. If elected BC Director, I would be given an opportunity to contribute more to the CTAA.
