

Alan Lichwa (Alberta Director Nominee)

Education: Bachelor of Science in Civil Engineering - University of Calgary

Work Experience: I have a strong background in materials engineering with over 12 years of experience in the asphalt industry. My roles have included binder technician at the University of Calgary and quality control and management positions at Lafarge Canada Inc. I specialize in material engineering, asphalt mixture design and R&D. My work has focused on quality control, innovation and improving construction practices.

Involvement with CTAA (Membership and Related Activities): I have been a CTAA member since 2017. While I have not held any official roles or participated in any volunteer activities to date, I'm now looking forward to becoming a more active member.

Why I Want to Serve on the CTAA Board: CTAA has played an important role in helping shape the asphalt industry since 1955. With over a decade of experience in asphalt materials, quality control and research, I believe my skills and experience can contribute to the organization's goals and support its continued success. The asphalt industry is changing due to innovation, sustainability and evolving infrastructure needs. It's an exciting time to be a part of the progress and I want to contribute to this progress. It would be a privilege to serve as the Alberta Director in promoting innovation in asphalt technologies and construction.
