

Geoff Petzold (Alberta Director Nominee)

**Education:** Obtained my bachelors degree in civil engineering from the University of Alberta in 2006 and have started my pursuit of a Master's degree, focusing on pavements - this degree pursuit is in progress.

**Work Experience:** I have worked in the consulting engineering industry for over 20 years. My primary focus has been on design and construction in the aviation world with a specialization on asphalt pavements' rehabilitation and repair. I started as a junior engineer and have worked my way up to Technical Director for a global firm (focusing primarily in the Canadian market). I have been fortunate enough to have worked on delivery of projects across the globe.

**Involvement with CTAA (Membership and Related Activities):** I have been a CTAA member since 2018.

**Why I Want to Serve on the CTAA Board:** As an Albertan, I believe that organizations such as CTAA are essential to the betterment of the construction and consulting industry. I want to work with the other board members to strengthen the immense offering that CTAA brings to the table. Education of industry professionals (young and old), bringing developing technologies to the ears and eyes of owners and sharing valuable lessons learned are essential services that organizations like the CTAA provide. I want to continue the existing CTAA legacy and work with the various groups and committees within the CTAA to continue this development and growth within the region and to be a voice for the valuable work that CTAA does within the community.
