

Matt Omelchuk (Alberta Director Nominee)

**Education:** I hold a Bachelor of Science in Anthropology from the University of Calgary.

**Work Experience:** I started my work career as an entrepreneur, running restaurants and convenience/gas stations. Since 2004 I have worked in the corporate oil and gas sector for both Husky and Cenovus Energy. My career has spanned several areas including IT, retail, contracts, marketing, and commercial commodity sales. Spanning across much of Canada, with positions in BC, AB, MB, and ON. I have an extensive background in commodity sales from refinery assets, both fuels and asphalt products.

**Involvement with CTAA (Membership and Related Activities):** I have been a member of CTAA for 2 years and have attended all events and learning opportunities that CTAA supports. I am currently supporting the planning committee for the 2026 annual conference. Cenovus/Husky have been sustaining members of CTAA for decades and contribute to the research and development of quality asphalt products and technologies.

**Why I Want to Serve on the CTAA Board:** I want to contribute to the passion and commitment that I have seen in abundance in the asphalt industry. This is a unique product that I truly feel fortunate to be a part of. I look forward to leveraging my commercial background as a bridge between the scientific and the construction aspects of asphalt and road building. I also want to help contribute to the advocacy of a tremendous product, with deep technical roots, to ensure that collectively we are delivering the best possible products and processes we can. I see this position as having a critical viewpoint to both academia and industry, a viewpoint that will help me to focus efforts on research and product development for our customers. Finally, to bring the value of an independent lab and partnership with the U of C asphalt lab that Cenovus is a part of.
